The Gender Related Development Index (GDI) is an index designed to measure gender equality.. GDI together with the
Gender Empowerment Measure (GEM) were introduced in 1995 in the Human Development Report written by the United
Nations Development Program.The aim of these measurements was to add a gender-sensitive dimension to the Human
Development Index (HDI).

Gender is the range of characteristics pertaining to, and differentiating between, masculinity and femininity.Depending on the
context, these characteristics may include biological sex (i.e., the state of being male, female, or an intersex variation), sex-
based social structures (i.e., gender roles), or gender identity. Traditionally, people who identify as men or women or use

Long-term, sustainable development will only be possible when women and men enjoy equal opportunity to rise to their
potential. But today, women and girls continue to face disadvantages in every sector in which we work, while in some cases,
boys are falling behind. For decades, USAID has been leading global efforts to achieve gender equality.
